16. ABSTRACT (A 200-word or less factual summary of most significant information. If document includes a significant bibliography or literature survey, mention it here.) The published output of NBS for 1966 through 1976 is cataloged and indexed in this two-volume publication. Parts 1 and 2 of Volume 1 consist of reprints of abstracts and full citations of all published papers during the 11-year period as they originally appeared in the NBS annual publication catalogs - NBS SP 305 and its Supplements 1 through 8. Volume 2 is a consolidated permuted key word index which directs the researcher of NBS literature either to the citations and abstracts of Volume 1 or to the same information in the nine annual catalogs issued during the 11-year period. Annual supplements to SP 305 will continue to update the NBS published output; the 1977 supplement is now available as NBS SP 305, Supplement 9. Complete catalogs available in two volumes, 2 parts each as follows: SP 535, Volume 1 (2 parts), order as Stock No. SN003-003-02010-9, price \$ 23.75 SP 535, Volume 2 (2 parts), order as Stock No. SN003-003-02011-7, price \$ 21.25

NBS TECHNICAL PUBLICATIONS

PERIODICALS

JOURNAL OF RESEARCH—The Journal of Research of the National Bureau of Standards reports NBS research and development in three disciplines of the physical and engineering sciences in which the Bureau is active. These include physics, chemistry, engineering, mathematics, and biological sciences. Papers cover a broad range of subjects, with major emphasis on measurement methodology and on basic technology underlying standardized. Also included from time to time are survey articles on topics closely related to the Bureau's scientific and technical programs. A special service to subscribers each issue contains complete listings of all recent NBS publications in NBS and NBS journals. Issued six times a year. Annual subscription (single): \$73.00 (foreign \$21.75). Single copy: \$12.00 (foreign: \$3.75 foreign).

Notes—The Journal was formerly published in two sections: Section A "Physics and Chemistry" and Section B "Mathematical Sciences."

MONOGRAPHS

This monthly monograph is published in various scientific subjects: Mathematics, physics, chemistry, medicine, and engineering, of the latest advances in science and technology. Of primary emphasis on the work of NBS. The monograph highlights and reviews such topics as energy research, fire, radiation, building technology, remote communication, pollution, environment, health and safety, and consumer product performance. In addition, it reports the results of Bureau activities in measurement standards and techniques, properties, properties and materials, engineering, standards and services, instrumentation, and automatic data processing.

Annual subscription: Domestic: \$10.00; Foreign \$11.95.

NONPERIODICALS

Monographs—Many contributions in the technical literature on various subjects related to the Bureau's scientific and technical activities.

Handbooks—Recommended copies of engineering and industrial practice (including safety codes) developed in cooperation with interested industries, professional organizations, and regulatory bodies.

Special Publications—Includes proceedings of conferences sponsored by NBS, NBS annual reports, and other special publications appropriate to this grouping such as wall charts, booklets, cards, and bibliographies.

Applied Mathematics Series—Mathematical tables, manuals, and studies of special interest in physics, engineering, health, biologists, mathematicians, computer programming, and others engaged in scientific and technical work.

National Standard Reference Data Series—Provides quantitative data on the physical and chemical properties of materials compiled from the world's literature and critically evaluated. Developed under a world-wide program coordinated by NBS. Program under authority of National Standard Data Act (Public Law 90-396).

NOTE: At present the principal publication outlet for data data is the Journal of Physical and Chemical Reference Data (JPCRD) published quarterly for NBS by the American Chemical Society (ACS) and the American Institute of Physics (AIP). Subscriptions, reprinting, and supplements available from ACS, 1155 Sixteenth St. N.W., Wash. D.C. 20036.

Building Science Series—Disseminates technical information developed at the Bureau on building materials, components, systems, and whole structures. The series presents research results, test methods, and performance criteria related to the structural and environmental functions and the durability and safety characteristics of building elements and systems.

Technical Notes—Studies or reports which are complete in themselves but restrictive in their treatment of a subject. Analogous to monographs but not so comprehensive in scope or definitive in treatment of the subject area. Often serve as a vehicle for final reports of work performed at NBS under the sponsorship of other government agencies.

Voluntary Product Standards—Developed under procedures published by the Department of Commerce in Part 10, Title 15 of the Code of Federal Regulations. The purpose of the standards is to establish nationally recognized requirements for products, and to provide all concerned interests with a basis for common understanding of the characteristics of the products. NBS administers this program as a supplement to the activities of the private sector standardizing organizations.

Consumer Information Series—Practical information based on NBS research and experience covering areas of interest to the consumer. Easily understandable language and illustrations provide useful background knowledge for shopping in today's technological marketplace.

ORDER above NBS publications from: Superintendent of Documents, Government Printing Office, Washington, D.C. 20407.

Order following NBS publications—NBSIR's and FIPS from the National Technical Information Service, Springfield, Va. 22161.

Federal Information Processing Standards Publications (FIPS PUB)—Publications in this series collectively constitute the Federal Information Processing Standards Register. Register serves as the official source of information in the Federal Government regarding standards issued by NBS pursuant to the Federal Property and Administrative Services Act of 1949 as amended, Public Law 89-306 (79 Stat. 1127), and as implemented by Executive Order 11717 (38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 CFR (Code of Federal Regulations).

NBS Interagency Reports (NBSIR)—A special series of interim or final reports on work performed by NBS for outside sponsors (both government and non-government). In general, initial distribution is handled by the sponsor; public distribution is by the National Technical Information Service (Springfield, Va. 22161) in paper copy or microfiche form.

BIBLIOGRAPHIC SUBSCRIPTION SERVICES

The following current-awareness and literature-survey bibliographies are issued periodically by the Bureau:

- Cryogenic Data Center Current Awareness Service.** A literature survey issued biweekly. Annual subscription: Domestic: \$25.00; Foreign: \$30.00.
- Liquefied Natural Gas.** A literature survey issued quarterly. Annual subscription: \$20.00.

Superconducting Devices and Materials. A literature survey issued quarterly. Annual subscription: \$30.00. Send subscription orders and remittances for the preceding bibliographic services to National Bureau of Standards, Cryogenic Data Center (275.02) Boulder, Colorado 80302.
